Flame Detector

## FLAME DETECTOR FOR COMMERCIAL & INDUSTRIAL APPLICATIONS

### PRODUCT DESCRIPTION

The Detectors Inc. Models **D381** and **D383** (D38X Series) Multi-Spectrum 3IR+UV are a new generation of optical flame detectors designed for detecting both Hydrocarbon and Non-Hydrocarbon fires. The D38X detectors sense Ultraviolet radiation in the UV spectrum and Infrared radiation in 3 discrete bands of IR spectrum for detecting fires. The Models D38X series detect flames and reject false alarm sources by utilizing the Convolution Method and Advanced DSP (Digital Signal Processing).

**The Model D381** is a detector designed for a multitude of general-purpose applications. The detector will respond to a 1 ft. x 1 ft. n-Heptane or IPA fires from 80 feet within 3-5 seconds.

**The Model D383** is a high-speed flame detector designed specifically for liquid spray paint and powder coating applications. The Model D383 offers a fast and reliable fire detection and monitoring for detecting flash fires within 0.3 in compliance with NFPA 33 Standard.

The Models **D38X** series are stand-alone fire & flame detectors in watertight NEMA 4 (IP66/67) and explosion-proof Aluminum enclosures designed for Class I, Division 2 (Zone 2) installations. The detectors feature automatic self-test for continuously checking the optical path integrity while monitoring the electronics to ensure utmost reliable operation and fault reporting.
